Database : MySQL , Postgresql.
Frameworks : Laravel, Bootstrap.

✆ PROJECTS

1. **ERP Web Application**

   - **Review:** It's a web application related to insurance policies, including health, life, and general insurance. We gather all the policy information from the insurance company and upload it into the ERP system within the life and health modules. Additionally, we can create new entries in the ERP portal, generate reports on the policies, and schedule payment reminders in the ERP system.

   - **Features**
     - Automated renewal uploads and day-by-day activity tracking.
     - Integrated reminder system for important policy dates.
     - Implemented comprehensive data filtering capabilities.
     - Utilized queuing for efficient large data uploads.
     - Enabled data export in Excel format for reporting.
     - Currently enhancing the life renewal upload process.

2. **JSR IAS Academy - Online Test Portal**

   - **Admin Panel and User Panel:**

     Review: JSR IAS Academy is an institute coaching center. We are developing an online test portal for users and an admin portal for dashboard,creating questions and evaluating tests. The admin portal will allow for module access creation, activation, and scheduling of tests for users batch-wise. We have created social media accounts for the coaching center, allowing us to receive enrollments both online and offline through these platforms.

     Features:

Secure login, dynamic scoreboards, comprehensive test management (creation, editing, publishing), and user management (registration, login, and user approval).

User-friendly registration and login, interactive online test interface, real-time scoring, and personalized dashboards.

Responsibilities:
➤ Creating different modules such as question paper page, create role access,exam schedule and enrollment page etc.
➤ Sending an email to the user's and admin for reports
➤ Understanding the client requirement and functionalities
➤ Build efficient, testable and reusable module.

3. *CORAL BEACH RESORT WEBSITE*

Review : I am developing a website for The Coral Beach Resort. Its include features for room booking, dining reservations, checking room availability, creating booking slots, and integrating a payment gateway.

Features:

Room Booking,Dining Reservation,Room availability check, Booking Slot Creation and Payment Gateway Integration

HTML | CSS | CORE-PHP | MYSQL

4. *JSR IAS Academy - Web application*

Review: JSR IAS Academy is an institute coaching center. I have developed a dynamic website that includes modules such as current affairs, class schedules, TNPSC, UPSC course details, a gallery, JSR materials, school books, and other courses like police and bank exam materials. All of this information can be viewed on the website, and new content can be uploaded through the admin portal.

Features:
➤ Provided access to all related notes, current affairs, books, institute photos, events, and registration forms.Implemented a gallery and resource sections for school books and study materials.
➤ Included detailed course calendars with information related to UPSC and TNPSC, including class schedules.Developed a robust admin interface for complete control over content and site management.
➤ Implemented dynamic modules for seamless content management and updates.
➤ Developed an admin panel for managing all aspects of the website, including module access, activation, and test scheduling.
